

## IFAMEVAC

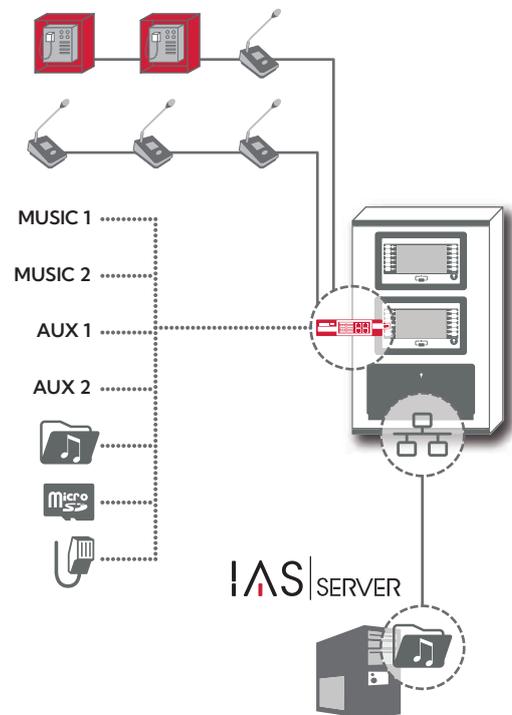

### Audio matrix module for Previdia Ultra control panels

Audio matrix module for Previdia Ultra control panels (supplied already assembled in the Previdia-Ultravox and Previdia-Vox control panels).

It fits inside the control panel cabinet on the CAN DRIVE+ connection bar and takes care of the digital processing of all audio sources.

Provides 2 analogue inputs for external sound sources ("MUSIC 1" and "MUSIC 2"), 2 analogue inputs for external sound sources with priority request ("AUX 1" and "AUX 2"). It has an internal flash memory containing emergency messages and user-definable messages, SD card slot for user-defined audio files, 2 lines for standard or emergency microphone bases (max 64 per line), and connection to the Ethernet network for interaction with IASS and IAS-APP servers.

Each control panel manages only one IFAMEVAC module.

#### MAIN FEATURES

- Connects to the CAN DRIVE+ bar inside the control panel cabinet
- Hot arming/disarming ("hot swap")
- Maximum one IFAMEVAC module per control panel
- 2 analogue audio inputs ("MUSIC 1", "MUSIC 2") for external sources
- 2 analogue audio inputs ("AUX 1", "AUX 2") with priority enrollment via the "PR" input or via signal level
- 2 inputs for microphone base lines ("PAGER A", "PAGER B") for the connection of standard or emergency bases
- Maximum 64 microphone bases per line
- Ethernet/TCP-IP input for up/downloading of audio messages and connection with the IASS server
- Internal flash memory with 4 minutes of audio Preconfigured with emergency messages in different languages, customizable via configuration software
- SD card memory slot (not supplied) for additional audio messages (combinable with predefined conditions, activation of inputs, timers, etc.)
- RJ45 connector for connection with PTT microphone and emergency telephone, housed in the front panel of the control panel
- Volume adjustment and 3-band equalization of external audio sources

# IFAMEVAC

## TECHNICAL SPECIFICATIONS

Operating power supply voltage	20 – 30 V $\overline{\text{=}}$ (powered by the CAN DRIVE+ bar)	
Maximum current draw	100 mA	
MUSIC 1/2 and AUX 1/2 input voltage	Max. 1 V $\text{rms}$ (non balanced between "+" and "GND" and between "-" and "GND")	
MUSIC 1/2 and AUX 1/2 input impedance	10K Ohm	
AUX 1/2 "PR" inputs	Clean contact to "GND"	
A /B PAGER lines	Microphone bases per line	Max. 61
	Current per line	Max 1A
	Total cable length per line	Max. 500m

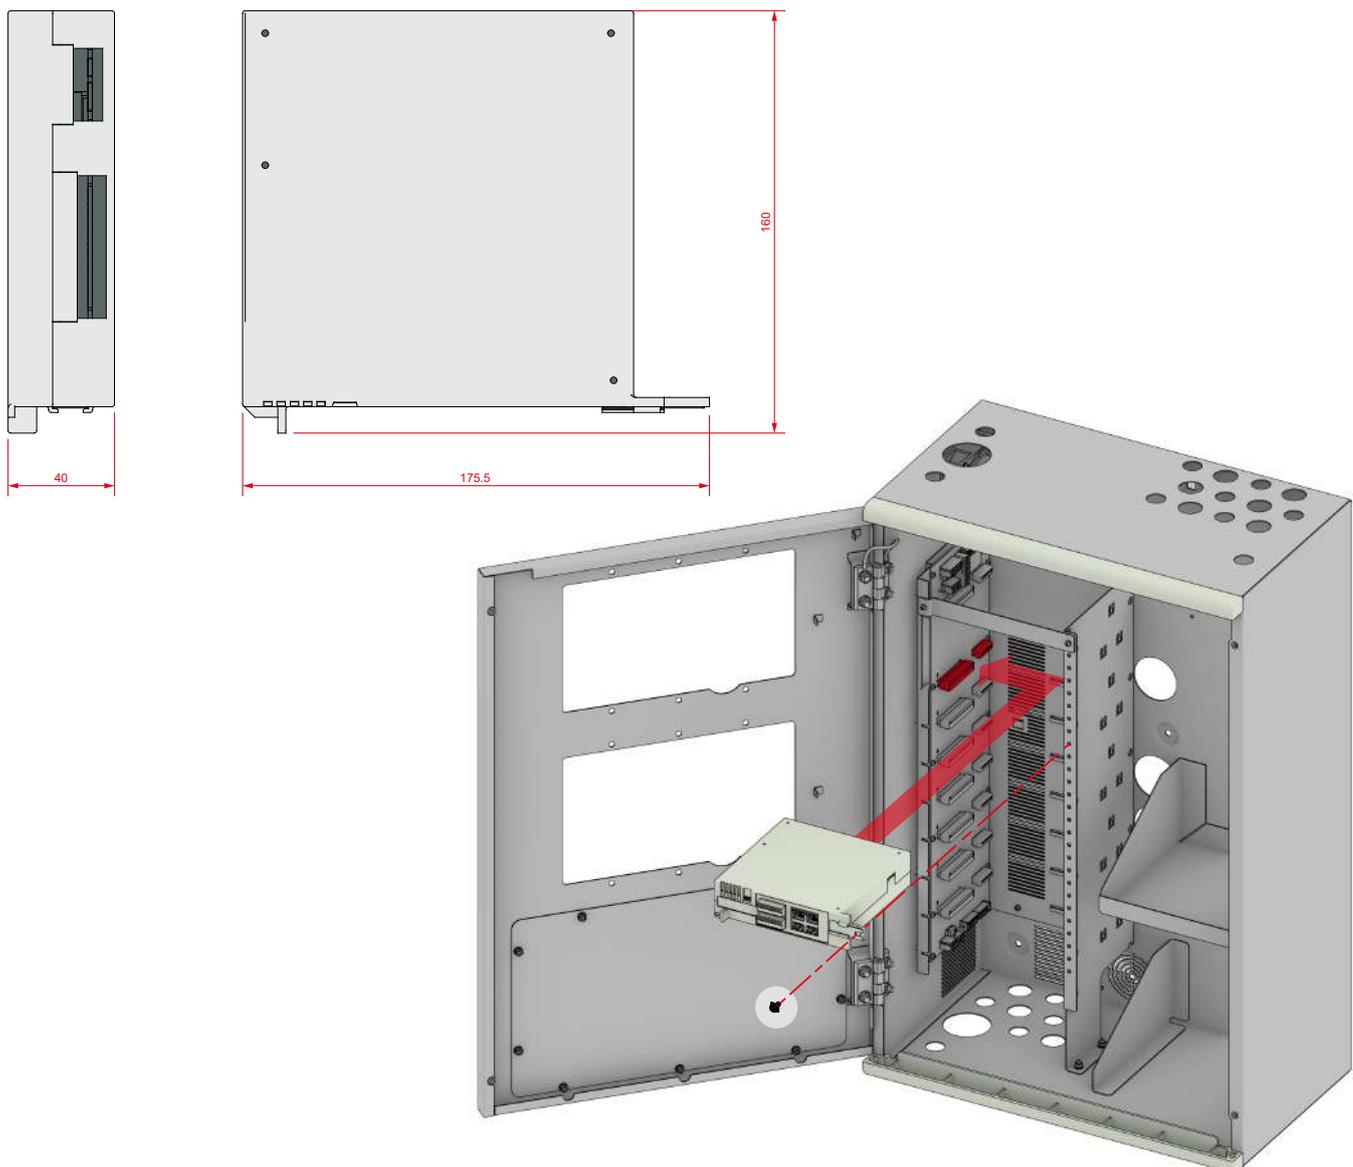

## MECHANICAL SPECIFICATIONS

Dimensions	175.5 x 160 x 40 mm	
Weight	330 g	
Enclosure	Enclosure material	Plastic
	Colour	RAL7015
	Flame class	UL 94 V-2

## HARDWARE SPECIFICATIONS

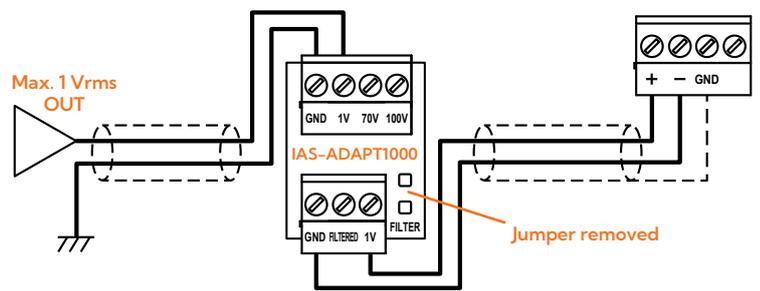

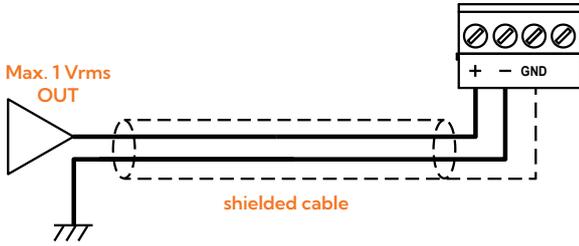

Audio processing	Internal DSP
Internal audio memory	4 minutes
External audio memory	FAT32 SD card, max. 32 GB
FW upgrade	via mini-USB port
Activity and status LED	5

## DIMENSIONS AND INSTALLATION

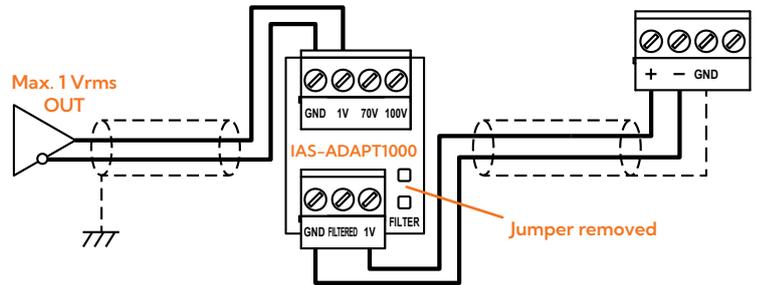

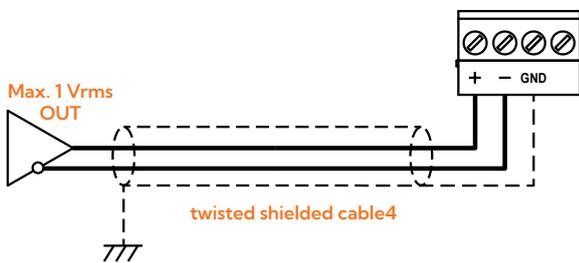

CONNECTIONS

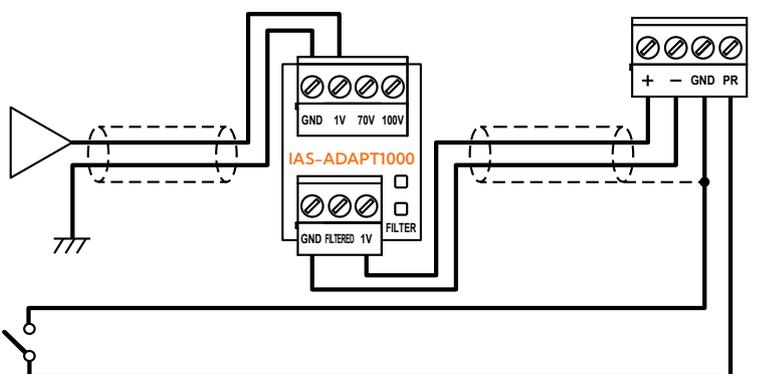

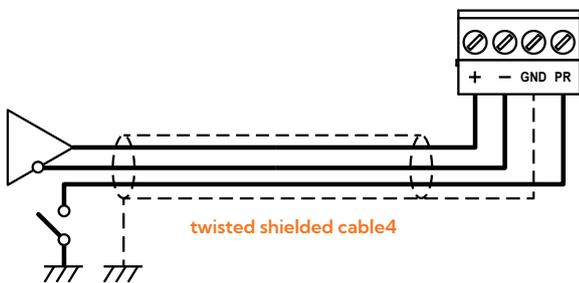

Non balanced audio source connections

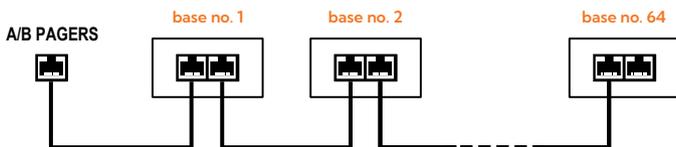

Balanced audio source connections

Audio source connections with priority request

Microphone bases connection

Double shielded straight  
cat. 5E SF/UTP cable

## ORDER CODES

---

<b>IFAMEVAC</b>	Audio matrix module for Previdia Ultra control panels (a module supplied already assembled in Previdia Ultravox and Previdia Vox control panels)
<b>IAS-ADAPT1000</b>	Module for adapting and decoupling audio signals input into the control panel
<b>IAS-LIC</b>	Licence for IAS server
