<b>Ratings</b> .....	Input: 1) 12V $\overline{=}$ , 1A 2) POE 48V $\overline{=}$ , 350mA

<b>Particulars: test item vs. test requirements</b>	
Equipment mobility.....	Stationary Equipment
Connection to the mains .....	Not directly connected to the mains
Operating condition.....	Continuous
Access location .....	Operator accessible
Over voltage category (OVC) .....	--
Mains supply tolerance (%) or absolute mains supply values .....	N/A
Tested for IT power systems .....	N/A
IT testing, phase-phase voltage (V) .....	N/A
Class of equipment .....	Class III
Considered current rating (A) .....	N/A
Pollution degree (PD) .....	PD 2
IP protection class .....	IPX0
Altitude during operation (m) .....	Up to 2000 m
Altitude of test laboratory (m) .....	Up to 2000 m
Mass of equipment (kg) .....	Max. 1.314kg
<b>Possible test case verdicts:</b>	
- test case does not apply to the test object .....	N/A
- test object does meet the requirement.....	P (Pass)
- test object does not meet the requirement.....	F (Fail)
<b>Testing</b>	
Date of receipt of test item .....	2016-06-27
Date(s) of performance of tests .....	2016-07-08 to 2016-07-15

**General remarks:**

The test results presented in this report relate only to the object tested.

This report shall not be reproduced, except in full, without the written approval of the Issuing testing laboratory.

"(see Enclosure #)" refers to additional information appended to the report.

"(see appended table)" refers to a table appended to the report.

Throughout this report a point is used as the decimal separator.

The instructions specified by the standard have to be in official language of each country, however, only English is checked for this report. It is the applicant responsibility to provide instruction in each official language of the EU.

This report is submitted for the exclusive use of the client to whom it is addressed. Its significance is subject to the adequacy and representative character of the sample(s) and to the comprehensiveness of the tests, examinations or surveys made.

This report justified only the submitted samples exclusively and not necessarily implies that all other samples are also to be found in same result.

The CE marking may only be used if all relevant and effective EC directives are complied with.

**Factor(ies):**

Zhejiang Dahua Vision Technology Co., Ltd.

Address: No.1199 Bin'an Road, Changhe Street, Binjiang District, Hangzhou, P.R. China.

**General product information:**

1. The equipment is an IP Camera. All electrical components are mounted on V-1 PCB and housed in metal enclosure fixed by screws.
2. Model difference:
  - 1) Models IPC-HFW8301EP, IPC-HFW8301EN, DH-IPC-HFW8301EP and DH-IPC-HFW8301EP are similar except for model description, lens size and enclosure logo.
  - 2) Models IPC-HFW8306EP, IPC-HFW8306EN, IPC-HFW8306EP-0722A, IPC-HFW8306EN-0722A, DH-IPC-HFW8306EP, DH-IPC-HFW8306EN, DH-IPC-HFW8306EP-0722A and DH-IPC-HFW8306EN-0722A are similar except for model description, lens size and enclosure logo.
  - 3) Models IPC-HFW8301EP and IPC-HFW8306EP are similar except for sensor board.
  - 4) Models ITC237-PW1A-IRZ, DH-ITC237-PW1A-IRZ, DHI-ITC237-PW1A-IRZ are identical to original model DH-IPC-HFW8306EN except for model description.
  - 5) **Models DHI-ITC237-PF1A-IR, ITC237-PF1A-IR, DHI-ITC237-PF1A, ITC237-PF1A, DHI-ITC237-PU1A-IRHL, ITC237-PU1A-IRHL, DHI-ITC237-PU1A-HL and ITC237-PU1A-HL are identical to original model DH-IPC-HFW8306EN except for model description and model name for different marketing.**
3. All ports complied with limited power source, see appended table 2.5.
4. The power adapter is evaluated again with the EUT at the maximum operation temperature as 60 degree C, see appended table 4.5 for details.
5. The product has been evaluated at ceiling and wall mounting means.

6. Unless otherwise indicated, all tests were conducted on DH-IPC-HFW8306EN to represent the other similar models.

**Other comments:**

The product was submitted and tested for use at the maximum ambient temperature (T<sub>ma</sub>) permitted by the manufacturer's specification of: 60 degree C.

**This report has been amended, due to the following:**

1. Add three model names DHI-ITC237-PF1A-IR, ITC237-PF1A-IR, DHI-ITC237-PF1A, ITC237-PF1A, DHI-ITC237-PU1A-IRHL, ITC237-PU1A-IRHL, DHI-ITC237-PU1A-HL and ITC237-PU1A-HL which are identical to original model DH-IPC-HFW8306EN except for model description and model name for different marketing.
2. Revise applicant, manufacturer and factory's address to No.1199 Bin'an Road, Changhe Street, Binjiang District, Hangzhou, P. R. China.

**For the above described change(s) the following was considered to be necessary:**

Modification	Testing	Comments	Result
1.	N/A	See sub-clause 1.7.1.2 for details.	N/A

Clause	Requirement + Test	Result - Remark	Verdict
<b>1</b>	<b>GENERAL</b>		P
<b>1.5</b>	<b>Components</b>		P
1.5.1	General	See below.	P
	Comply with IEC 60950-1 or relevant component standard	(See appended tables 1.5.1)	P
1.5.2	Evaluation and testing of components	Components that are certified to IEC and /or national standards are used correctly within their ratings. Components not covered by IEC standards are tested under the conditions present in the equipment.	P
1.5.3	Thermal controls	No thermal control.	N/A
1.5.4	Transformers	No transformers provided.	N/A
1.5.5	Interconnecting cables	No interconnecting cables provided.	N/A
1.5.6	Capacitors bridging insulation	No such capacitor.	N/A
1.5.7	Resistors bridging insulation	No such resistor.	N/A
1.5.7.1	Resistors bridging functional, basic or supplementary insulation	Same as above.	N/A
1.5.7.2	Resistors bridging double or reinforced insulation between a.c. mains and other circuits	Same as above.	N/A
1.5.7.3	Resistors bridging double or reinforced insulation between a.c. mains and antenna or coaxial cable	Same as above.	N/A
1.5.8	Components in equipment for IT power systems	Class III equipment.	N/A
1.5.9	Surge suppressors	No such suppressor.	N/A
1.5.9.1	General	Same as above.	N/A
1.5.9.2	Protection of VDRs	Same as above.	N/A
1.5.9.3	Bridging of functional insulation by a VDR	Same as above.	N/A
1.5.9.4	Bridging of basic insulation by a VDR	Same as above.	N/A
1.5.9.5	Bridging of supplementary, double or reinforced insulation by a VDR	Same as above.	N/A

1.7.2.2	Disconnect devices	This equipment is not permanently connected equipment or pluggable equipment.	N/A
1.7.2.3	Overcurrent protective device	This equipment is not permanently connected equipment or pluggable equipment.	N/A
1.7.2.4	IT power distribution systems	Class III equipment.	N/A
1.7.2.5	Operator access with a tool	No tool is required to gain access to operator access area.	N/A
1.7.2.6	Ozone	No ozone produces within this equipment.	N/A
1.7.3	Short duty cycles	Equipment is designed for continuous operation.	N/A
1.7.4	Supply voltage adjustment .....	No adjustment of supply voltage necessary.	N/A
	Methods and means of adjustment; reference to installation instructions .....	Same as above.	N/A
1.7.5	Power outlets on the equipment .....	No outlet provided.	N/A
1.7.6	Fuse identification (marking, special fusing characteristics, cross-reference) .....	No fuse provided.	N/A
1.7.7	Wiring terminals	No such terminals provided.	N/A
1.7.7.1	Protective earthing and bonding terminals .....	Class III equipment.	N/A
1.7.7.2	Terminals for a.c. mains supply conductors	Same as above.	N/A
1.7.7.3	Terminals for d.c. mains supply conductors	Same as above.	N/A
1.7.8	Controls and indicators	See below.	P
1.7.8.1	Identification, location and marking .....	The function of controls affecting safety is obvious regardless of language.	P
1.7.8.2	Colours .....	Colours of the LED indicator are used for functional controls or indicators.	P
1.7.8.3	Symbols according to IEC 60417.....	No switch used.	N/A
1.7.8.4	Markings using figures .....	No indicators for different positions.	N/A
1.7.9	Isolation of multiple power sources .....	Only one supply connection.	N/A

IEC 60950-1			
Clause	Requirement + Test	Result - Remark	Verdict
	<p><b>Zx.1 General</b>                      This sub-clause specifies requirements for protection against excessive sound pressure from personal music players that are closely coupled to the ear. It also specifies requirements for earphones and headphones intended for use with personal music players.</p> <p>A personal music player is a portable equipment for personal use, that:                      is designed to allow the user to listen to recorded or broadcast sound or video; and                      primarily uses headphones or earphones that can be worn in or on or around the ears; and                      allows the user to walk around while in use.</p> <p>NOTE 1 Examples are hand-held or body-worn portable CD players, MP3 audio players, mobile phones with MP3 type features, PDA's or similar equipment.</p> <p>A personal music player and earphones or headphones intended to be used with personal music players shall comply with the requirements of this sub-clause.</p> <p>The requirements in this sub-clause are valid for music or video mode only.</p> <p>The requirements do not apply:                      while the personal music player is connected to an external amplifier; or                      while the headphones or earphones are not used.</p> <p>NOTE 2 An external amplifier is an amplifier which is not part of the personal music player or the listening device, but which is intended to play the music as a standalone music player.</p> <p>The requirements do not apply to:                      hearing aid equipment and professional equipment;</p> <p>NOTE 3 Professional equipment is equipment sold through special sales channels. All products sold through normal electronics stores are considered not to be professional equipment.</p>		N/A

	<p><b>Zx.2 Equipment requirements</b>                      No safety provision is required for equipment that complies with the following:                      equipment provided as a package (personal music player with its listening device), where the acoustic output <math>L_{Aeq,T}</math> is <math>\leq 85</math> dBA measured while playing the fixed "programme simulation noise" as described in EN 50332-1; and                      a personal music player provided with an analogue electrical output socket for a listening device, where the electrical output is <math>\leq 27</math> mV measured as described in EN 50332-2, while playing the fixed "programme simulation noise" as described in EN 50332-1.</p> <p>NOTE 1 Wherever the term acoustic output is used in this clause, the 30 s A-weighted equivalent sound pressure level <math>L_{Aeq,T}</math> is meant. See also Zx.5 and Annex Zx.</p> <p>All other equipment shall:                      a) protect the user from unintentional acoustic outputs exceeding those mentioned above; and                      b) have a standard acoustic output level not exceeding those mentioned above, and automatically return to an output level not exceeding those mentioned above when the power is switched off; and</p>		N/A

	<p>c) provide a means to actively inform the user of the increased sound pressure when the equipment is operated with an acoustic output exceeding those mentioned above. Any means used shall be acknowledged by the user before activating a mode of operation which allows for an acoustic output exceeding those mentioned above. The acknowledgement does not need to be repeated more than once every 20 h of cumulative listening time; and</p> <p>NOTE 2 Examples of means include visual or audible signals. Action from the user is always required.</p> <p>NOTE 3 The 20 h listening time is the accumulative listening time, independent how often and how long the personal music player has been switched off.</p> <p>d) have a warning as specified in Zx.3; and</p> <p>e) not exceed the following:</p> <ol style="list-style-type: none"> <li>1) equipment provided as a package (player with its listening device), the acoustic output shall be <math>\leq 100</math> dBA measured while playing the fixed "programme simulation noise" described in EN 50332-1; and</li> <li>2) a personal music player provided with an analogue electrical output socket for a listening device, the electrical output shall be <math>\leq 150</math> mV measured as described in EN 50332-2, while playing the fixed "programme simulation noise" described in EN 50332-1.</li> </ol> <p>For music where the average sound pressure (long term <math>L_{Aeq,T}</math>) measured over the duration of the song is lower than the average produced by the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA. In this case T becomes the duration of the song.</p> <p>NOTE 4 Classical music typically has an average sound pressure (long term <math>L_{Aeq,T}</math>) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the song and compare it with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA.</p> <p>For example, if the player is set with the programme simulation noise to 85 dBA, but the average music level of the song is only 65 dBA, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dBA.</p>		N/A

This requirement is applicable in any mode where the headphones can operate (active or passive), including any available setting (for example built-in volume level control).
