

iClock S560

Proximity T&A Terminal with **Built-in PoE**

Easy to install, and with a modern design, it is the perfect solution for small and middle installations. It incorporates internal POE which working together with new Push SDK offers a complete solution for cloud systems. The color TFT display makes easier to all users an easy menu management.

iClock S560 is based on ZEM800 platform which allows more memory capacity and professional firmware functions. It can connect to Time & Attendance management software by Ethernet and also operate on standalone mode, downloading data by USB pendrive.

- Professional Firmware Version with advanced features
- Built-in PoE
- New Push SDK 3.0 for Real Time & Cloud Systems
- Fully configurable Attendance Events

Standard Functions

- Accrued balances management per user
- Pendrive download structure defined by user
- Multiverification by user
- Function keys definition by weekday and time range

Optional Functions

ZKTime Enterprise

ZKTime Enterprise includes new utilities and features to attendance control, making it easier to handle and serving a wider range of specific cases.

Match and process punches automatically after downloading, warning about odd of punches or days with a special case, facilitating and speeding up the work of attendance management.

We will automatically control all in and outs of each employee, and the events that might occur (breakfast, lunch, medical, personal business, lateness, etc.).

Ability to divide the hours worked by different concepts (normal pool, night, etc..) and carrying an economic assessment of the same. Includes an access control module, where you can define different access time slots and days for each employee.
